Medical knowledge isn't required but does help, here is why

The intent of the author is to offer a new type of yearly physical coined, "Medical Epigenology Hand & Wrist Assessment" (MEH&W-Assessment). Whereby each examination is associated with a unique number. When the examiner has a positive match its corresponding exam identification number is recorded on a worksheet. After examination (about 45 minutes) the Epigenologist sends the worksheet with their license number to a processing computer data base to be interpreted. It also controls an infinite number of variations too complex for any human brain. The examination procedure utilizes Symptomatic physical testing, visual and a few Q & A methods. It's engineered to examine any hand regardless of its complexity with ease. Extracting Symptoms & Epigenetic features. Designed to help Medical pros save a lot of time on what is ailing their patients and your clients. Helping people to stabilize their lifestyle for a healthier and successful life. DECLARATION of Epigenology

Anyone with a grade 12+ can become Registered / Licensed Epigenologist (RL-Epigenologist), with an option to open their own Epigenology practice. Must all follow its "Declaration of Epigenology" document that defines its basic principles. To register and acquire a license go to--> (www.epigenologymedical.com) website. It's a new & exciting home based business career for the 21st century which is both fun and easy only because a medical knowledge isn't required. It's a new format that automates the Hand & Wrist Assessment which a computer Data Base does all the interpretations and infinite number of variations for the Epigenologist.

Ability to perform an Unbiased Non-invasive "Hand and Wrist" assessment, electronically interpreting what ever is extracted. Its purpose is define a type of diagnostic tool helping people live a healthier life style and make the right choices in life for success. Including helping the preventive health care medical community. It can be used to easily replace the cancelled yearly physical. It saved the author's life maybe yours and others as Well. Current the author is in the process of automating the American "Surgeon Generals Geriatric Hand & Wrist assessment exams advancing it even farther with medical institution data, globally. It won't have Epigenetics just the latest physical and visual symptom and a few questionnaires, coined: "Medical Hand & Wrist Examination" (MH&W-EXAMS), is specific to medical Practitioners, Nurses & Nurse Practitioners only. By adding global Medical Universities data to our computer data-base that interprets the the selected symptoms it becomes a very powerful diagnostic tool. It's works in a chronological manor whereby if the examiner if interrupted for any given reason can resume their examine at anytime.

All Registered Licensed Epigenologists must be able to work hand-in-hand with other medical professionals in their surrounding communities or globally online. Once Epigenologists have their certificate of completion and a license to practice Epigenology Medical. They are required to incorporate their names or a business name if they are to work from their residences.

I ask all Epigenologist they must incorporate for liability reasons. The following text must be part of their corporate structure including non-profit organization as well. It is the responsibility of the individual being examined to make sure their Epigenologist is registered & Licensed to practice Epigenology Medical before any assessment can begin. The more one practices Epigenology the more proficient they become in examining the human hands & Wrists. Much like a Doctor practicing medicine, some are more proficient than others, etc. Because Epigenology Medical exams are repetitive in nature using an incremental methodology increases their skill sets via physical, Visual examinations.

An acquired experience can range from 1, 2, 3 and 5 years respectfully that adds a unique Epigenology Medical crest to their repertoire. Once a person downloads our **FREE Exam Manual** practicing on themselves and other. If confident they can file an application to become an Epigenologists. We are building a YouTube "Epigenology Mediical TV" Channeling that will have videos for training purposes some will be linked on our website: (www.epigenologymedical.com). Its a good idea for wannabe Epigenologists to practice on themselves, family and friends at first to get an idea of how easy it is to learn and use with confidence.

Any learned institutions (Collage / University) that teaches "Epigenology Medical Hands & Wrist Examinations" must have a Registered Licensed Epigenologist Practitioner with at least 5 years of experience on their faculty. Remember, life without Epigenology Medical exam is chaos.

Author's Perspective

Epigenology Medical examines the medical effects and the Science of Epigenomics of both Hands and Wrists Epigenetics is the effect our environment has on altering or clouding our normal genes as we age based on free will to survive that environment. The hands are the most profound and sensitive part of our body that shows Epigenetic changes more than any other part of our bodies. The brain utilizes a lot of its grey power to utilize the hands as an end effector or tool. Hence, by examining them then interpreting these changes as we age. Allows anyone to control their lives medically and psychologically including projecting ones life based on past and current events is what Epegenomics is all about. If a bad projection its up to the individual to change their lifestyle or they will succumb to their projections. The author's own exams demonstrated he would die of a heart attack at age 55. So he intervened by having heart surgery and it worked, Now his Hands & Wrist defines a new longer life projection. Go to (www.epigenologymedical.com) "Proven Evidence" webpage for real evidence.

Epigenology can also be associated with choosing careers, geographical areas for a better life including how to pick a proper political/religious beliefs, etc. How we live our life does affect our genes (Epigenetics is University proven) in many ways, good or bad under free will choices. After living a new lifestyle within months new projections emerges if bad change is made positive if good stay as is you are. Do nothing and the individual will suffer the consequences either way. It's what makes us who we are?

Its scientifically known Human Species encompasses an energy being within itself, consciousness. When consciousness is harmonious with instinct we have a normal human healthy life pattern. But if a human is born with an abnormal brain or becomes ill or Instinct (Whether bad or good) can easily affect our consciousness that which interferes directly with human nature itself causing humans to make wrong choices in life, its just my understanding not a belief. (Edited for Canada).

Epigenologist Registration No. _____

Epigenologist License No. _____

Please Understand

Becoming a Registered Licensed Epigenologist Hand & Wrist Examiner is easy as 1-2-3. Once you've been approved, certified. The Medical Epigenology Exam Manual is FREE and can be downloaded from our website (www.epigenologymedical.com). Its purpose is to allow people to practice examining themselves and others. Because our processing center interprets your exam results for you. Anyone can send in their worksheets for a partial exam interpretation for a small fee at any time during their method of practice. Go to our website "SHOP" Menu to learn how. First approach is to perform a partial Hand & Wrist assessment on anyone to see if you have the right stuff. Don't forget the brain is like a muscle it just needs mental exercise to stay and sharp so practice as much as possible.

Epigenologists are licensed to perform non-invasive unbiased hand & Wrist examination for the public at large and medical community as well a form of preventive health care service. Epigenology Medical examines and interprets, via a computer DB, physical / visual symptoms, environmental issues along with interpreting unique Epigenetic features of the human hand in its entirety regardless of its complexity. It can be defined as a complementary medical assessment report prior to having a medical check-up or used to complement existing diagnosis. Including verifying and/or enhancing medical diagnosis. Medical Epigenology Computer data bases is separate process designed that interprets and controls an infinite number of variations generating reports for the Epigenologist's clients. Interpreting psychological and physical symptoms. Plus under the auspice of Epigenomics Projected destinies can easily be defined and used based on past or current lifestyles, including childhood years associated with a parent/guardian's Environment. All with little or NO medical knowledge required.

Medical Epigenology process requires the examiner to FIRST, perform a physical / Visual and Q & A of their client's Hands & Wrists. SECONDLY, record their extracted exam titles and corresponding Descriptive Features (finger prints, nail types, phalanges and all other hand symptoms and marks etc.) numbers on a worksheet. All in a chronological methodology using a set procedure prescribed in the Epigenologist Practitioners' Manual instructions. THIRDLY, The resulting data, numbers, are then fed into our computer DB generating client's reports sent directly to them based on the client's address described in their invoice and worksheets. Medical Epigenology is supported by ongoing research from Universities all over the world, such as: University of California at Berkeley, Liverpool University and the London Health Sciences Centre in the U.K.
